Milestone 1 -Workout Log Peer Review

Quality of Work – Partial Credit 2 Points

Comments: The readme file is very odd, it is only showing the Kaltura video inside of the log (could be an error uploading), but also has no information regarding a short breakdown of what you'd like to do for this application. Instead of posting only a Kaltura video describing what you'd like to do with this project, a short brief paragraph inside of the readme file would perfectly suit an easily readable overview of what you'd like to do.

Intellectual Merit – Partial Credit 2 Points

Comments: The project overall is a great and simple application to be built as a senior in Computer Science, I feel like the project is more than feasible to finish within the time limit of the semester, I feel like it may be done too early for the semester instead of not done on time. Maybe adding a few other options within the application to prevent the project from cutting short early.

Video – Full Marks 3 Points

Comments: The video gave a clear, decisive description of what he is going to be doing on this project, and accurately displays and show what he plans to do with the project itself. He goes into detail in the video about each section of the project and how he is going tackle the project throughout the semester.
