Milestone 2 Review – Workout Log

Quality of Work – 3 Points – The overall work, and code of the project is organized, well developed, and shows a clear understanding of what is going on within the project. It gives me a good sense of what the project is developing into.

Project Progress – 3 Points – Overall I feel like the progress of the project is going well based on the uploads within the GitHub repository, main features are displayed and looks to be working properly and demonstrating well.

Video – 3 Points – The video does an amazing job of showing what is going on inside of the code within the project and gives me a clear understanding of where you are at inside of your project. The features are well placed, and overall is shown perfectly in the video.
